

This is the Pie Chart we can understand:

- how many number of Males & Females are present in the Table

Count of Gender

Through this Histogram we can understand:

How many number of people lies in between particular age

- As you can see the Y-axis shows you the "Number of People" are present
- X-axis shows you the age Range

For Example if we look at the 2nd bar that is been plotted you can see on X-axis from range around 18 till 23 we have 20 peoples
